## 1 PREAMBLE

The purpose of the project is to develop a Reporting standard model to fulfill accounting requirements in the production of reporting with respect to generally admitted accounting principles.

The accounting entries, result of wide range of business events, resource consumption and agent actions, sorted by account in a trial balance, aggregated in one or more items with a chart of mapping, allow to obtain any kind of reporting (accounting, fiscal, financial, statistic, ratios, etc.) according to the organization of the accountancy and the reporting of the entity.

### 3 OBJECTIVES

The objective of this document is to standardize the Business Processes, the Business Transactions and the Information Entities regarding the technical description and information of the reporting, and by extension, any kind of information reporting due or issued by an entity, being for internal or external purpose.

The Business Process is the detailed description of the way partners have to play their respective role, establish business relationship and share responsibilities to interact efficiently with the support of their respective information system.

The business documents are composed of Business Information Entities (BIE), which when available, are taken from the library of reusable business information entities and when not found, are proposed as new Business Information Entities. The contents of the business documents and the Business Information Entities are presented using class diagrams.

## 4 SCOPE

The scope for this project consists in building a standard reporting due to designated collecting organizations being publicly empowered or acknowledged data collectors and with the financial, accounting and audit analysts.

This reporting will be available to, and usable for all businesses activities enabling completion of business scenario. The project includes all business sizes, internal as well as relocated accounting processes, domestic and international environments, single company and corporate, and concerns all activity domains.

A demonstrator will be produced in collaboration with TBG18 related to electronic data exchange of accounting documents between agricultural companies and the control authority of the sector in France.

## 5.4 BUSINESS RULES

The use of Core Components is conditioned with the following rules:

- Use of Item of the ACC *Report*, we can indifferently associate one or more ACC which relies on it; for example, the identification of a fellow associate requires the use of ACC *Person*, *Organization*, *Address* and possibly of *Expected Information* to indicate the number of detained shares; the BBIE *Next Item* enables to indicate which will be the next ACCs in order to control the sequence;;
- The ASCC *Report. Dependent. Report* admits in theory an unlimited number of iterations; in practice, we might find most often less than 100 iterations; however, in some cases, for example if we have to produce a fixed assets list, the number can frequently exceed several tens of thousands “Item” elements.

## 5.5 DEFINITION OF TERMS

**Accounts Chart:** Chart designed in sight of grouping data elements of a data model from a detailed level to produce different aggregated object in another data model (≡ Chart of Accounts).

**Information collection authority:** Public or Private Authority empowered to collect information from public or private businesses.

**Financial reporting (or Financial Information):** Periodic statements mainly based upon accounting books required of a business reflecting an overview of its financial position; the financial report is presented in a structured manner and legible and understandable form.

([http://en.wikipedia.org/wiki/Financial\\_audit](http://en.wikipedia.org/wiki/Financial_audit))

**Financial audit:** A **financial audit**, or more accurately, an **audit of financial statements**, is the review of the financial statements of a company or any other legal entity (including governments), resulting in the publication of an independent opinion on whether or not those financial statements are relevant, accurate, complete, and fairly presented (source [http://en.wikipedia.org/wiki/Financial\\_audit](http://en.wikipedia.org/wiki/Financial_audit)).

**Financial accounting:** Financial accounting is the field of accountancy concerned with the preparation of financial statements for decision makers, such as stockholders, suppliers, banks, employees, government agencies, owners, and other stakeholders ([http://en.wikipedia.org/wiki/Financial\\_accounting](http://en.wikipedia.org/wiki/Financial_accounting)).

**Formality:** Set of documents prescribed by the law, the rule, dependent on the achievement of certain legal, administrative, financial or accounting instrument, like condition of validated.

**Form Template:** The form template expresses extra restrictions such as presentation, multiplicity, vocabularies, etc. and provides information of the final appearance such as labels and groupings.

**Lexical nomenclature:** Nomenclature that is organized like a kind of regular expression based, on a pattern with a defined number of characters hierarchically split with

several coded dimensions. Such a nomenclature enables to arrange on a conceptual basis any information that an entity must disclose being related to financial, economic, statistical, juridical, or social matters.

**Management accounting** is concerned with the provisions and use of accounting information to managers within organizations, to provide them with the basis to make informed business decisions that will allow them to be better equipped in their management and control functions ([http://en.wikipedia.org/wiki/Management\\_accounting](http://en.wikipedia.org/wiki/Management_accounting)).

**Open-book accounting** is an extension of the principles of Open-book management to include in an organisation's accounts all those with an interest in the organisation, not merely its employees and its shareholders (including those whose shareholding is managed indirectly, for example through a mutual fund) ([http://en.wikipedia.org/wiki/Open-book\\_accounting](http://en.wikipedia.org/wiki/Open-book_accounting)).
